CONJUNTO DE DATOS

La empresa cuenta con más de 300 millones de registros de aproximadamente 680 estaciones ubicadas en cerca de 20 proyectos ubicados a largo de todo el país en aeropuertos, zonas mineras o industriales o de infraestructura clave para el desarrollo de Colombia. Los datos son obtenidos en tiempo real con sensores automáticos o de manera manual con monitoreos realizados en campo.

Debido al alto volumen de datos de estaciones automáticas la empresa tiene almacenada en 39 bases de datos no relacionales (MongoDB) los datos provenientes de los equipos de medición y cuenta con la misma cantidad de bases de datos relacionales (MySQL) para variables de interés de los proyectos. La información se podrá consultar en archivos planos CSV con registros de estaciones seleccionadas y luego se suministrarán los servicios web / APIs / Endpoints necesarios para tener acceso a los registros de monitoreos de ruido en tiempo real.

DESCRIPCIÓN CONJUNTO DE DATOS

Una muestra de las cantidades de datos para diferentes proyectos se muestra en el siguiente cuadro:

De los anteriores datos cerca de 50 millones son registros de ruido.

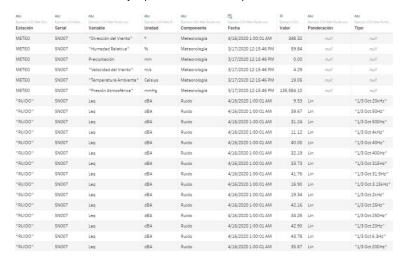

Para una estación con información de ruido y meteorología, el conjunto de datos está estructurado de la siguiente manera:

Ejemplo tipos de datos

Como se puede observar en las imágenes anteriores, lo anterior corresponde al siguiente esquema de datos:

| Campo | Tipo | Descripción |
|-------------|--------------------------|---|
| Estación | Texto (string) | Nombre de la estación |
| Serial | Texto (string) | Serial del equipo / monitor |
| Variable | Texto (string) | Variable monitoreada |
| Unidad | Texto (string) | Unidad de medición |
| Componente | Texto (string) | Componente / temática medición |
| Fecha | Fecha (date / timestamp) | Fecha y hora de medición |
| Valor | Número decimal (float) | Valor de la medición |
| Ponderación | Texto (string) | Ponderación de la medición de ruido |
| Tipo | Texto (string) | Tipo frecuencia de la medición de ruido |

DATOS EXPORTADOS

Acorde a las instrucciones de la convocatoria los datos se han exportado de las bases de datos a archivos CSV, encontrándose datos para 2 proyectos y dentro de cada proyecto (comprimido cada uno en .zip), se encuentran los archivos CSV por nombre de estación y separados por registros mensuales disponibles (codificados de la siguiente manera: "nombreestacion_AAAA-MM.csv), tal como se muestra en la tabla presentada en las páginas siguientes con información detallada de cada archivo generado para el programa:
